Submersible Pump 12 LE with Ventilation

REICH WATER SOLUTIONS

Information

Dimensions	45 mm
Pack size	23.9 x 12.3 x 4.6 cm
Net weight	155 g
Gross weight	175 g
Catalogue page	437

Rely on the Reich submersible pump with air vent for an efficient, reliable and user-friendly solution for your water supply. Experience how easy and convenient pumping water can be and benefit from the advanced technology and long service life of this product.

Ventilation – quick start without manual intervention

The integrated ventilation enables the submersible pump to remove air build-up automatically, ensuring a quick and smooth start. This function is particularly advantageous in systems that have to be started frequently or where air in the system can lead to malfunctions. The bleed function of the Reich submersible pump makes manual intervention a thing of the past.

Simple installation or replacement and reliable operation

The Reich submersible pump is designed for ease of use and durability. Its installation is uncomplicated and thanks to its robust design, it is suitable for both frequent use and demanding applications. The use of high-quality materials guarantees a long service life and minimises maintenance requirements.

Specifications

Pressure	0.6 bar
