Information

Dimensions	34 x 178 x 20 cm
Pack size	185 x 36 x 8 cm
Net weight	6.6 kg
Gross weight	7.5 kg
Catalogue page	211

With the alcove ladder Basic, you discover an innovative solution that makes your access to alcove, lifting or rear beds safer and more comfortable.

This ladder is designed so that its steps always remain in a horizontal position, regardless of the angle. This way, they seamlessly comply with the safety standards of DIN EN 1646-1:2012. Its design combines functionality with a great look: the ladder can be folded for space-saving storage and has an elegant appearance. With a step depth of 20 cm, it makes climbing up exceptionally comfortable.

Made from robust aluminium for long-lasting durability. The steps can be covered with PVC or carpet (not included) to customise the interior of your vehicle, allowing the ladder to be used between a bed edge height of 150 to 175 cm. The steps themselves are made of a high-quality plastic that strikes a balance between lightness and stability.
