Type	Senso4s PLUS

With Bluetooth remote transmission of measurement and reporting data to a smartphone or tablet. The Senso4s PLUS fill level indicator measures the weight of the gas cylinder and transmits this value to the app via Bluetooth. The app automatically calculates the fill level and creates a consumption forecast.

Advantages and features:

- Easy to install: switch on Bluetooth, place the gas cylinder on the adjustable feet of the Senso4s fill level indicator, measure and read the values in the app
- For all common steel, aluminium and plastic gas cylinders with a filling weight of up to 16 kg
- Connection via Bluetooth between Senso4s and your smartphone/tablet
- Menu language of the app: German, English, French, Italian, Spanish or Slovenian
- Records the parameters filling and tare weight of the respective gas cylinder
- Management of several gas cylinders in different sizes
- From the second measurement, the app already calculates

a long-term forecast of the gas consumption

• If a Bluetooth connection is established, the Senso4s PLUS sends the measurement data to the app at 15-minute intervals

• Battery level indicator of the level meter in the app

• May also be used e.g. in the gas cylinder box of recreational vehicles thanks to ATEX certification.

• Specially designed for operation in recreational vehicles – among other things, thanks to a motion sensor that interrupts the measurement while driving and thus prevents false measurement results.

Technical data:

• Measuring accuracy: ± 1%

• Senso4s PLUS protection class: IP44

• Supply voltage: 3 batteries type AAA LR03 1.5 V Alkali (not included)

Please note: for error-free measurement, the Senso4s PLUS measuring device must be placed on a flat and solid surface. The app for the Senso4s PLUS can be downloaded free of charge for the respective operating system from the Apple App Store or the Google Play Store.
