Insect Repellent MR-300 LI black, PT-19

Information

Dimensions	14x20x5.5 cm
Pack size	27 x 14 x 6 cm
Net weight	190 g
Gross weight	312 g
Catalogue page	103

The MR-300LI mosquito repellent in black offers reliable protection against biting mosquitoes and other blood-sucking insects – ideal for camping, caravanning, fishing, hunting or at home in the garden. Using proven Thermacell technology, it creates a protective area of up to 15 square metres that repels up to 98% of mosquitoes.

The device operates with eucalyptus citriodora repellent pads, which are heated by a small butane gas burner with piezo ignition (without an open flame). This releases a repellent substance, inspired by nature, that is barely noticeable to humans. As a result, the surroundings remain almost odourless – a clean and skin-friendly alternative to sprays and lotions.

Handling is particularly simple: insert the repellent pad, connect the gas cartridge and start at the push of a button. Full protection unfolds after just a few minutes. Thanks to its robust construction and compact design, the device is also easy to use on the go.

The delivery includes an initial supply for 12 hours of protection, consisting of one butane gas cartridge and three repellent pads.

Specifications

Colour	black
Type	MR-300LI

Advantages:

- Reliably protects up to 15 m² of surrounding area from mosquitoes
- Effectiveness up to 98%
- Odourless and no skin contact
- Easy to operate with piezo ignition
- Incl. initial supply for 12 hours of use
