Manufacturer's no. V0006220

VE.Direct Bluetooth Smart Dongle

Information

Pack size 20x20x7.5 cm

Net weight 120 g

Gross weight 120 g

With the VE.Direct Bluetooth Smart Dongle, you can display your BMV or MPPT information on iOS and Android devices. You need the VictronConnect app for this. Display information such as the battery status, solar panel energy and other useful data wirelessly.

The dongle is able to read data from all products with a VE.Direct connection (e.g. battery monitors from the BMV-70x series, Phoenix inverters with VE.Direct connection and MPPT solar charge controllers).

This also includes the instant readout function: When the VE.Direct Smart Dongle is connected to a BlueSolar MPPT, BMV-70x or a Phoenix VE.Direct inverter, VictronConnect displays the most important data of these products on the device list page without the need for a paired connection. This also includes visual notifications of warnings, alarms and faults, enabling diagnostics at a glance.

Specifications

Colour black
