High-Load Fuse HD 80 A

BÜTTNER
→DOMETIC

Information

Pack size	10.8x10.2x1.3 cm
Net weight	20 g
Gross weight	20 g

Secure protection for high currents

The HD 80 A high-load fuse is suitable for use in 12 V and 24 V systems and is installed in a suitable high-load fuse holder. It reliably protects powerful consumers and high charging currents from overload.

It is ideal for applications such as inverters, anchor winches, bow thrusters and chargers. The charging cable to the RV battery can also be specifically protected with the fuse.

The robust design makes the 80 A high-load fuse a reliable solution for onboard electrical systems.

Specifications

Content	1 piece
Nominal voltage	12 V 24 V
Nominal current	80 A
Type	HD
