

Item no. 322/906
Manufacturer's no. 3208

Circuit Distributor Minus Distributor

Information

Dimensions	9x6x3.8 cm
Pack size	14x12x3.5 cm
Net weight	80 g
Gross weight	90 g

Proper power routing in the vehicle is not just a matter of tidiness, but rather an absolute necessity to ensure safety on board. The frequently encountered tangle of cables running from the battery behind the furniture walls makes it difficult to find the cause in the event of a fault and often poses a serious risk.

Small, indispensable helpers from the VOTRONIC range of peripheral devices provide a remedy here, including professional distribution and protection of the battery positive side and safe earthing conditions.

Specifications

Nominal voltage	12 V 24 V
Variant	Minus-Distributor 12
