Item no. 052/102
Manufacturer's no. LST260

Telescopic Ladder incl. Leitertec System, 260 cm

LEITERTEC

Information

Dimensions	47 x 260 x 7.2 cm
Pack size	77 x 49 x 8.2 cm
Net weight	9.4 kg
Gross weight	10.2 kg
Catalogue page	211

Specifications

Max. load	150 kg
Colour	black
Material	aluminium
Steps	8

Be it on a motorhome, on the house wall or on delicate glass surfaces – this well-designed ladder reliably adapts to a wide variety of surfaces. The soft rubber protects painted and smooth surfaces, while special felt pads protect sensitive surfaces such as textured plaster or wallpaper. Thanks to the innovative suction system, the ladder sits particularly securely, providing an extra level of safety with every use.

The biggest advantage and benefit of telescopic ladders is their small size during transport. The ladder can be collapsed to a compact size, allowing you to store it even in tight spaces. The carrying handle makes it comfortable to carry, and the entire Leitertec system fits perfectly between the first two steps in the specially made bag. It does not take up any extra space!

The high-quality black powder coating of the ladder and the Leitertec system, combined with the red suction cups, perfectly complement each other and also visually set it apart from other ladders. The connecting arms are made entirely of aluminium. From the very first touch, you will be able to feel the quality. Colour-coded red-green indicators on each step make it very easy to see whether the steps are properly locked into place.

• **Compact and mobile:** thanks to its small pack size, the ladder is easy to transport.

• **Safe on any surface:** suction cups with rubber protect smooth surfaces, felt pads for rough walls.

• **Tool-free handling:** ready for use or packed away in seconds.

• **Certified:** tested according to EN 131-6 for commercial and private use.

• **Visual safety:** red-green indicators show that the steps are properly locked.

Scope of delivery:

• Ladder

• Ladder holder
