### Elegant design meets thoughtful function:

This modern LED wall light made of black aluminium combines indirect ambient lighting and a flexible reading spot in a stylish housing. The warm white light creates a cosy atmosphere – perfect for reading, relaxing or as subtle room lighting.

Two separate rocker switches allow individual control of both light sources. Especially practical: the integrated inductive charging surface, which enables smartphones to be charged wirelessly and conveniently.

**Modern, functional and elegant – the ideal lighting solution for caravans and motorhomes.**
