

Item no. 322/845
Manufacturer's no. 9620000218

Battery Computer MT 5000 iQ, 200 A Shunt

BÜTTNER
→ DOMETIC

Information

Dimensions	8x8.5x2 cm
Pack size	20.9x14.1x5.6 cm
Net weight	350 g
Gross weight	400 g

Precise monitoring of your battery

The battery computer MT 5000 iQ is your reliable combined device for the precise display of voltage, charge/discharge current and remaining battery capacity in Ah and per cent.

Comprehensive information at a glance

In addition to displaying the remaining capacity, the MT 5000 iQ also provides information on the outside temperature (min./max. memory), time and date.

Automatic control of your consumers

Thanks to the programmable switching output, consumers can be switched on or off automatically. The measurement is carried out via a measuring shunt mounted on the battery pole, which transmits precise data to the computer electronics.

Built-in version for flexible use

The MT 5000 iQ is supplied as a built-in version; the surface-mounted housing can be ordered separately. Enjoy simple operation and reliable performance!

Specifications

Installation depth	1.5 cm
Colour	black
Nominal voltage	12 V 24 V
Nominal current	3 mA
Type	MT 5000 iQ/200 A-Shunt
Variant	200 A Shunt
