Manufacturer's no. Flatterstop

Flatterstop Clips for Awnings

Information

Pack size	22 x 13.5 x 5 cm
Net weight	110 g
Gross weight	120 g

Stable side walls in any wind and weather

With the Flatterstop clip, your side wall stays securely in place even in stronger winds. The practical clips firmly connect the side wall to the awning fabric on the rafter pole, creating a stable, sealed unit – ideal for more comfort and protection in the awning area.

Thanks to the included protectors, the awning fabric is additionally protected from abrasion or other damage. This keeps the material durable and in good condition. Installation is very easy and completely tool-free – simply attach the clip and protector, click into place and you are done.

For optimal fastening, five clips per side wall are recommended. The set includes 10 Flatterstop clips and 10 awning fabric protectors, making it perfect for securely and stably fixing both side walls at once.

Advantages:

- Ensures taut, flutter-free side walls in any wind and weather
- Firm connection between side wall, awning fabric and rafter pole
- Gentle protectors prevent the awning fabric from being damaged
- Simple, tool-free installation

Specifications

Colour	black
Content	10 pieces
Material	plastic

- Set with 10 clips and 10 protectors – sufficient for two side walls

Ideal for anyone who wants to reliably fix awning side walls while simultaneously protecting the awning fabric long-term.
