

Item no. 322/869

Manufacturer's no. TRC-M 12-12 50A

Battery-to-Battery Charger 50 A with Vibration Sensor

Information

Dimensions	335 x 163 x 64 mm
Pack size	37.4 x 17.9 x 7.4 cm
Net weight	2.3 kg
Gross weight	2.5 kg

Euro 5/6 vehicles are often equipped with a low-voltage alternator. In these so-called „Blue Motion“ vehicles, it is not possible to successfully charge a second battery due to the standard isolating relay. The PB-Trc M1212/50 Euro 5/6 charger is suitable for this purpose. It can charge at the correct charging voltage of 14.4 V with max. 50 A.

With motion-controlled (M) signal. When the engine is running/switched on, it emits a slight vibration and the built-in vibration sensor switches the charger on. Provides a stable boost or increased charging power in the vehicle and/or boat.

- Easy installation
- Soft start
- Temperature-compensated
- Euro 5/6 movement

Specifications

Charging current	14.4 A
Nominal current	50 A
Type	Trc-M
