Solar Panel OBD-2 Battery Charger

SOLARA®
module, komponenten, systeme

Information

Dimensions	396x225x4 mm
Pack size	38x26.5x3.5 cm
Net weight	550 g
Gross weight	800 g
Catalogue page	607

The 14 W solar charger is a practical and versatile charging device for vehicles, specifically designed for motorhomes, camper vans and similar vehicles. It prevents battery self-discharge through effective maintenance charging and can be easily attached to the windscreen or dashboard with suction cups. It is connected via the vehicle's OBD-2 port. An integrated control board protects against overcharging and discharging of the battery. The panel uses high-quality mono-crystalline low-light cells and is extremely robust due to the double-sided ETFE film. With its compact design, it is suitable for year-round use.

Included in the **scope of delivery** are a 2.2 m connection cable with OBD2 plug, an integrated charge controller, four professional suction cups, a fuse cord and a detailed installation manual.

Specifications

Cable length	2.2 m
Number of panels	1
Nominal power solar panel(s)	14 Wp
Daily output	56 Wh
Type	E52M8
