Information

Dimensions	47x85x19 mm
Pack size	13.6x8.4x4.8 cm
Net weight	30 g
Gross weight	70 g
Catalogue page	434

Precisely control your water supply

The **VOTRONIC fresh water tank level indicator S** offers you a reliable and precise way to keep an eye on the fill level of your fresh water tank at all times. With **10 coloured LEDs**, the current level is displayed in three colours – from full, through intermediate levels, to almost empty. This allows you to recognise trends immediately and manage your water supply safely and efficiently.

Exact fill level display with intermediate steps

Unlike simple indicators, the fresh water tank level indicator S also shows **intermediate levels**. This gives you not only a rough orientation but a detailed picture of the current tank contents.

Safe dosing and supply

Thanks to the continuously rising or falling LED display, you can see a **real-time representation** of the tank contents during **continuous operation**. This allows you to fill your fresh water tank precisely and without overflow, which in turn ensures more comfort and safety while travelling.

Advantages:

Specifications

Colour	silver
Content	1 piece
Nominal voltage	12 V 24 V

- **Precise fill level control** through 10 LEDs
- **3-colour display** for clear overview
- **Intermediate levels visible** for exact dosing
- **Direct representation of tank contents** during continuous operation
- **Increased safety** for your water supply on the move

Installation dimensions (W x H x D): 30 x 63 x 15 mm
