

Item no. 610/466
Manufacturer's no. 21238

Screw-On Magnetic Fitting, lateral with elongated hole

Information

Dimensions	50x30x10 mm
Pack size	5x3.2x1 cm
Net weight	53 g
Gross weight	63 g
Catalogue page	374

The screw-on magnetic fittings can be used either frontally or laterally depending on the design. They can be securely and stably mounted with two screws. The wide versions with two elongated holes each allow for precise adjustment of the position.

The screw-on magnetic fittings impress with a housing made of powder-coated metal, which ensures both a high-quality appearance and high strength. With a construction height of only 10 mm, the system is particularly flat and discreet. A powerful neodymium magnet guarantees reliable holding force* (25 N/2.5 kg). The rubberised contact surface protects against scratches and ensures a pleasant, quiet closing sound. In summary: robust, high-quality and aesthetically pleasing.

* The forces were determined at room temperature on a polished steel plate (S235JR according to DIN 10 025) with a thickness of 10 mm (1 kg ~ 10 N). A deviation of up to -10% from the specified value is possible in exceptional cases. Generally, the value is exceeded. The type of application (installation situation, temperatures, counter-anchors, etc.) can significantly influence the forces. The specified values are for guidance.

Specifications

Colour	grey
Content	1 piece
Variant	lateral with elongated hole
