Gross weight	100 g
Catalogue page	469

The filter for the electric ventilator S220/S260 reliably ensures that the exhaust air from your composting toilet is cleanly and hygienically discharged outside. This keeps the air around the toilet pleasantly fresh – even with frequent use. The filter significantly contributes to the effectiveness of the odour filter and supports a hygienic climate throughout the entire sanitary area.

Thanks to the simple replacement mechanism, the filter can be easily changed. Regular replacement maintains the performance of the ventilation system and prevents unpleasant odours. This ensures that your composting toilet remains fully functional and always provides a clean, fresh atmosphere – be it in a motorhome, in a camper or on a boat.
