TW-DES replacement filter for Comfort and Economy
 Replacement filter cartridge for water filters „Economy“ and „Comfort“.
 Easy to replace, excellent filter performance, high water flow.

Please note the flow direction on the filter housing. Rinse all adapters, hoses, filters and accessories with a sufficient amount of water before filling up the tank. Use only for occasional filling of water tanks; not suitable for permanent connection. We recommend disinfection with BIOLYSAN® Wasserhygiene disinfectant after each use of the filling filter unit to prevent germ and bacteria growth in the filter. To do this, drain the remaining water from the unit, close the stop-cock and fill 5 ml of BIOLYSAN® Wasserhygiene disinfectant into the filling unit at the outlet. Shake gently and empty out excess product. Any remaining product residues are washed out before the next use.

Use biocidal products carefully. Always read the label and product information before use. Dispose of old filter inserts in household waste.
