Pages 400

Simply set off and stop wherever you like. Make a campfire, enjoy the tranquillity of nature and sleep comfortably in your own bed in the evening, which you always have with you thanks to your caravan, motorhome or van. The next day you can decide: will you stay because it is so nice here, or will you move on? This is the new freedom – camping makes you happy! But how do you go about it if you have never been camping before?

Of course you can just set off: You will see what you have forgotten and not thought about! Or you can find out in advance: which camping vehicle is right for you, whether it is better to buy your own vehicle or what advantages (and perhaps disadvantages) a rental vehicle brings, what you really need to take with you and what you can confidently do without, what you should look out for when choosing where to stay, how to camp in the most relaxed way with kids, etc.

This handbook by camping experts Nele, Jalil and Sebastian from CamperStyle.de takes a detailed and helpful look at all aspects of the popular hobby of camping and the trending van life. Countless tips on suitable vehicles, possible and necessary technology, equipment and, of course, specific travel planning help you get started and are guaranteed to leave no questions unanswered. With this in mind: Ready.

Steady. Camp!
