This modern filter system retains bacterial germs such as legionella, Escherichia coli and pseudomonas with a retention rate of > 99.99999%, as tested by an accredited laboratory for medical devices in Germany. It is used to produce hygienically clean water for motorhomes, caravans and camping.

The KT08 filter is only suitable for use with drinking water and is manufactured in food quality. Do not use water of unknown origin or doubtful quality.

The filter must be replaced after 6 months at the latest. It can be installed vertically or horizontally according to the installation instructions. It is essential to use the appropriate quick couplings.
