

Item no. 322/902
Manufacturer's no. 5330

LED Control Board Info Panel Pro

Information

Dimensions	20x5.5x1.8 cm
Pack size	23x8.5x5 cm
Net weight	80 g
Gross weight	170 g
Catalogue page	609

The RV and starter batteries can be precisely monitored via the voltage display. The light bar also clearly shows intermediate values, as the LEDs operate with different brightness levels. By pressing a button, you can permanently select the display of either the RV or starter battery, or switch it off completely – in which case the Info Panel Pro and the connected tank sensors will be without power.

The tank levels are also shown as three-colour light bars, each with ten LEDs. The stepless brightness control ensures that the values can be read much more accurately than with conventional displays, which usually only have five levels. If the tank display remains on, the continuously rising or falling bar always shows the current content – ideal for carefully filling the fresh water tank.

Specifications

Nominal voltage	12 V
