Carbon Filter Cartridge Compact for Extraction Units of Macerator and Household Toilets

Information

Dimensions	11 x 8 cm
Pack size	11.5 x 8.5 x 8.5 cm
Net weight	110 g
Gross weight	130 g

Carbon filter cartridge Compact for SOG® extraction units

The Compact carbon filter cartridge is suitable for all SOG® Compact extraction units in macerator toilets as well as for SOG® Home extraction units in household toilets. It reliably and effectively prevents unpleasant odours in the vehicle. The integrated activated carbon fully binds odour molecules and ensures noticeably better air quality – both indoors and outdoors.

Effective odour neutralisation through activated carbon

The filter cartridge is based on activated carbon made from organic materials such as peat, nut shells or sugar. Its highly porous structure provides a maximum surface area for odour absorption. The open pore structure acts like a fine mesh network that reliably captures even the smallest molecules.

- Suitable for all SOG® Compact (macerator toilets) and SOG® Home (household toilets) extraction units
- Reliably prevents the formation of unpleasant odours indoors
- **Recommended replacement: once a year**
- High filter performance through fully processed activated

Specifications

Colour white

carbon

- No dust generation during installation or operation
- Lightweight and compact
- Long service life of up to 12 months

Maintenance

An annual replacement of the filter ensures the full functionality of the extraction system and prevents odour development even outside the vehicle. Timely replacement contributes to continuous fresh air supply and overall hygiene.
