Well thought-out and practical for everyday use

These inner bags for the cloth bag Z-Saggerl are a practical addition for waste management in everyday life. They are made of robust, durable material and can be easily cleaned thanks to the smooth surface – either by hand or in the washing machine at 30 °C.

With their clever design featuring press studs, you can securely fix the bags in the Z-Saggerl. To do this, simply fold the edge outward, which causes the handles to disappear between the bag and the outer material. This way, nothing gets caught and the waste ends up exactly where it is supposed to go.

The inner bags are reusable and help to significantly reduce the consumption of single-use rubbish bags. In the XL version, they are available in a practical double pack – with a capacity of 8 litres each.

Specifications

Colour	grey
