Learn the secret of how roasts, steaks and other dishes always turn out perfectly: monitor the core temperature!

The hygienic stainless steel probe can remain in the oven or barbecue during the entire roasting process. Simply insert it into the meat and lead the cable out of the cooking chamber. Attach the device with the stand or magnet near the oven and you can now read the core temperature on the coloured display at any time. Ideal for cooking at low temperature.

This versatile appliance can also be used for other parts of food preparation, such as checking the temperature of baby food.

- Universal kitchen probe thermometer, ideal for optimal preparation of meat and poultry by monitoring the core temperature
- Can be used for the oven and barbecue, also for cooking at low temperature
- Alarm when target temperature is reached
- Colour display, backlight and sensor keys
- Stainless steel probe with approx. 1 m cable
- With magnet and stand
