## TC Energy Cells TC2D

HYDRACELL  
POWERING A POSITIVE FUTURE

### Information

|              |                |
|--------------|----------------|
| Dimensions   | 12.7 x 4 cm    |
| Pack size    | 21 x 11 x 5 cm |
| Net weight   | 110 g          |
| Gross weight | 260 g          |

Energy cells in a double pack for HydraCell AquaPro flashlights. This water-activated cell replaces harmful conventional batteries. To activate, simply dip the cell in water for 15 seconds, then shake it off and insert it. Thanks to the innovative technology and its long lifespan, the number and weight of required batteries are significantly reduced. This, in turn, reduces the consumption and the long-term environmental impact from used batteries. The cells provide reliable, long-lasting light output and are made of plastic.

(\*) occasional reactivation required

Ideal for the HydraCell Aqua Pro flashlight. A single TC2D HydraCell energy cell offers an impressive runtime of over 120 hours, equivalent to the performance of more than 20 AA premium alkaline batteries.

### Specifications

|         |          |
|---------|----------|
| Colour  | grey     |
| Content | 2 pieces |
| Type    | TC2D     |
