Dimensions	16x25 cm
Pack size	28.3x28.3x11.1 cm
Net weight	785 g
Gross weight	1.14 kg
Catalogue page	665

The RoadBaker brings a breath of fresh air to mobile kitchens. be it golden brown rolls in the morning, hearty casseroles for dinner or a delicious cake for a snack – with this compact oven, you can prepare a variety of dishes even on the go. The 2.8-litre baking dish is equipped with an advanced non-stick ceramic coating, making it particularly easy to remove the food from the oven. This makes the oven incredibly convenient and easy to clean.

The specially designed glass lid is heat-resistant and allows you to keep an eye on the baking process at any time – without having to open it. This saves energy and ensures an even result. The RoadBaker works on nearly all common heat sources such as gas, electric, barbecues or camping stoves. It cannot be used on induction stoves. Three components work together to ensure an even distribution of top and bottom heat. Sturdy handles make the oven safe to use, even when it is hot.

- **Versatile:** suitable for pizza, rolls, casseroles, cakes and more
- **No fixed installation required:** usable on barbecues as well as on gas, electric, camping or solar-powered stoves

Specifications

Colour	cream white
Capacity	2.8 l
Content	2.8 l
