Net weight	50 g
Gross weight	260 g
Catalogue page	663

Give your palate a break from fast food and treat yourself to a home-cooked meal instead, which you can easily prepare at home. To do this, fill the aluminium mould with food and take it with you on your trip. You can then easily heat the mould with the Omnia oven. You also have the option of freezing the food beforehand, taking it with you and then defrosting it in the Omnia oven. After a busy week at work, this option will certainly taste better than fast food on your first evening away. Moreover, it is also a healthier alternative.

Tip: A frozen dish in the aluminium mould can also be used as a cold pack in your cool bag.

Usage:

To get the most out of the Omnia Oven, it is recommended to use the Omnia aluminium mould specially designed for it. Proceed as follows:

1. Place the aluminium mould in the Omnia oven and remove the cardboard lid.
2. Carefully fold in the edges of the aluminium mould so that the lid fits properly.
3. Select a low to medium temperature to heat or defrost the food. This allows even heating without burning or overhea-

ting the food.

By using the Omnia aluminium mould and handling the Omnia Oven correctly, you can comfortably prepare your meals and enjoy them on the go. However, always follow the manufacturer's specific instructions to get the best results.

Material:

Recyclable aluminium. Is disposed of as metal packaging and thus becomes the raw material for new aluminium products. This saves energy and the raw material ore. Meets the requirements of the FDA standard (USA) and the German LFGB standard. Do not use food with high acid and/or salt content.
