WC-PURE Inlay

WC PURE *Hygiene*

Information

Pack size	25.5 x 25.5 x 3.1 cm
Net weight	100 g
Gross weight	150 g
Catalogue page	471

An absolute „must-have“ for the toilet!

The toilet area has always been a very sensitive area. However, the application of the WC-PURE inlays offer substantial changes and improvements. PURE inlays protect the toilet bowl from contamination. Furthermore, the inlays provide protection from splashing water and the associated risk of infection. This inlay is very easy to use. The PURE inlay is placed in the toilet bowl and flushed down after use. To flush it away, you only have to use the economical flushing. The toilet inlay dissolves immediately after flushing and is also not an additional burden for the waste water. To be used with household toilets, chemical toilets as well as bedpans and children's potties.

Improvements thanks to use of WC-Pure:

Restricting the transfer of bacteria by splashing water –
Reduction of valuable drinking water and waste water – No
contaminated toilet bowl – The purification and the associated
germ transmission by the brush is not applicable – Less
cleaning agents.
