

Item no. 311/305
Manufacturer's no. KS300

Voltage Limiter

TOPTRON powered by  Frankana group

Information

Dimensions	12x2x2 cm
Pack size	12x2x2 cm
Net weight	20 g
Gross weight	20 g

The Toptron CPU voltage limiter eliminates voltage peaks > 15 V in the vehicle electrical system, e.g. caused by abruptly switching off the BMS with lithium batteries. The voltage limiter is connected directly to the 12 V supply socket of the CPU control unit and ensures an uninterrupted voltage supply to the CPU gas system.

Scope of delivery CPU voltage limiter:

Voltage limiter < 13.8 V DC ready-made with 120 mm cable and direct connection to the 12 V supply socket of the CPU control unit
