Item no. 301/325
Manufacturer's no. T3-01120

MADE IN GERMANY

Fill Level Indicator Urinometer for Composting Toilet Trelino® Evo M/L

TRELINO®

Information

Dimensions	12 x 5.5 cm
Pack size	14.5 x 6.5 x 6.5 cm
Net weight	23 g
Gross weight	63 g
Catalogue page	473

Specifications

Colour	orange
Size	M/L
Material	PP polypropylene

Mechanical fill level indicator for composting toilets

Being informed in advance saves you from unpleasant surprises: with the Trelino® Urinometer, the fill level of the urine canister is visible at a glance. The clever level indicator works purely mechanically and alerts you to a critical fill level with a conspicuous signal arrow. Ideal for everyone who does not want to realise too late that their toilet's canister is full.

Instead of having to tediously lift, shake or empty the canister merely on suspicion, a quick look at the urine outlet suffices. The orange arrow in the sight field means: it is time for the next emptying stop. The Urinometer operates completely without electricity or external technology – reliably, hygienically and straightforward.

- **Visual warning of overfilling** – prevents hygienic incidents and ensures clean use.
- **Immediately visible upon opening the lid** – even when it is dark or inside a closed van.
- **No power, no electronics** – autonomous camping without technical failures.
- **Easy to maintain and clean** – can be cleaned with diluted vinegar or cleaners based on effective microorganisms.

Frankana® Caravan und Freizeit GmbH – Südstraße 4 – 97258 Gollhofen – Germany

• **More stable membrane holder** – the installation provides additional support to the silicone membrane.

How the Trelino® Urinometer works

An integrated float rises with the urine level in the canister. It is connected via a rod to a plastic arrow that extends outward through the urine outlet of the separation insert. Once the fill level reaches the critical point, the orange arrow tip becomes visible – a simple but effective warning.

Installation is very straightforward: the display is slid over the canister lid's membrane. Then, the lid is screwed on tightly as usual. The arrow remains movable, the membrane stable – and the overview reliable.

Suitable for:

Dry composting toilets in vans, motorhomes, garden sheds, boats or autonomous tiny houses. Everywhere where comfort and hygiene matter in a compact space.

Scope of delivery:

- Fill level indicator (holder with float)
- Silicone membrane
