

Item no. 322/218
Manufacturer's no. 103250

Isolating Relay 70 A

Information

Dimensions	2.5x5x2.5 cm
Pack size	5x2.5x2.5 cm
Net weight	35 g
Gross weight	35 g
Catalogue page	592

Many Euro 5 and almost all Euro 6 vehicles are equipped with an intelligent alternator. In these vehicles, the function of 12 V isolating relays and D+ simulators is only partially or no longer possible. To ensure charging of the RV battery/batteries, a charging booster or BCB must be installed.

After the engine is turned off, the relay separates the starter battery from the RV battery. The relay is controlled via the D+ signal from the alternator or the D+ simulator. Diode protection for the alternator is already integrated. Switching current (max.) 70 A.

Specifications

Colour	black
Nominal voltage	12 V
Nominal current	70 A
